

sedumdirect

from The Nursery

The preferred Sedum blanket for extensive green roofs

About Sedumdirect

Sedumdirect "The Nursery" has been growing Sedum blankets for over 10 years and currently cultivates over 500.000m². We supply many of the major green roof system suppliers throughout Europe with our high quality precultivated Sedum blankets. Our Sedum blankets comprise of a unique mix of Sedum species to suit the local climate and to keep weight and maintenance to a minimum. Our blankets are harvested and delivered to our customers within 48 hours as of ordering.

Applications

Our Sedum blankets are used for extensive green roof vegetation with various slopes as well as ground cover on roundabouts, tramway beds, embankments, etc.

Variety

The heart of our blankets is a biodegradable carrier which is filled with a fine layer of the best extensive growing medium available. You will find 5-8 different small and large leaf species of Sedum in our blankets. The blankets are well hardened and have experienced at least one winter period. The coverage is at least 85%. Upon request the Sedum blankets can be mixed with a mix of wild flower and herbs.

Why Sedumdirect?

- High quality
- Excellent service
- Quick and secure delivery within 48hours
- Unbeatable in price!

Installation

Our Sedum blankets are delivered to site ready for installation. It is recommended to install the Sedum blankets within 48 hours of arrival on site. The Sedum blankets must be stored in a cool, dry and shaded place. For the best coverage, the blankets should overlap approx. 25mm. Once installation is completed the entire build up should be watered.
